SUPPLEMENT TO  
REPORT NO.

. THIS IS UNEVALUATED INFORMATION

25X1X

1. On about 1 January 1953 a section of RFT-Koepenick responsible for developing and projecting high-frequency radio transmitter stations was removed from direct control of the Koepenick plant and placed, for purposes of direction and administration, under the Buero fuer Wirtschaftsfragen. Another responsibility of this section is the supervision (Ueberwachung) of production of various parts needed for constructing transmitter stations. These parts are manufactured by many different East German plants.
2. This section, now called "Funkplanung" (Radio Planning), employs about 30 engineers and is headed by Herbert Coenen, SED. Most of these men were formerly employed by Telefunken. The section is located in Haus 38 of the RFT-Koepenick plant. Strict security measures are being enforced, separating this section physically from the rest of the Koepenick plant.
